

New Book :- The Occurrence of Diamonds in South Africa

Two years ago Mike Wilson of the Council for Geoscience approached me with the concept of producing a book on diamonds within South Africa. Mike wanted to publish a book that not only recorded and discussed the various diamond occurrences within South Africa, he wanted a book that would serve to stimulate interest and investment in South Africa's diamond industry as well as a book that would serve as a general reference to the South African diamond industry.

This has turned out to be a great reference book; richly illustrated and thoroughly researched (with contributions from numerous experts within the industry). Unlike similar historical publications, this book pays equal attention to both kimberlite and alluvial deposits....both small and large producers.

If you would like to order a copy please contact Thelma Swart: +27(012) 841 1017 or thelmas@geoscience.org.za
